

# First Class 2000 Release Notes – Build 245

10 May 2002

Menu	Sub-Menu	Details
File	Import-Text Files	Some errors that were occurring have now been fixed.
	Export-RollCall	There is now an export to "RollCall".
Maintenance	Extras	Where used, fractional extras tally correctly in all reports.
Tools	Block Generation	Imported subject choices, if they create clashes, now appear correctly in the Block Generation.
		There was a bug that stopped some subjects being loaded into the Block Generator. This has been fixed.
		The cutting off of the last digit for a room in the printout of some timetables has now been fixed.

Items shaded in grey are new features. Note that this is only a minor release, mainly for the RollCall export.
