

First Class 2000 Release Notes – Build 223

21 February 2002

| Menu | Sub-Menu | Details |
|------------------------------|------------------------|--|
| File/ Maintenance | Export/VASS | The export to VASS is now complete. Focus codes can be associated with appropriate subjects, student candidate numbers can be imported if the data is available, the export can limit the year levels to export. |
| File | Save As | The "infinite loop" bug has been fixed. |
| | | You are now asked if you wish to overwrite a database if it already exists |
| Maintenance | Export | You must now save before moving from one export type to another. |
| | Blocks | Class entries into blocks are made simpler. If you type in the first couple of characters of a subject code, the current choice will be the first one that starts with those characters. |
| Reports | Class/Lists | It is now possible to print individual class lists, and to print one per page. |
| | All appropriate | Students' forms now print on all appropriate printouts. |

Items shaded in grey are new features.
