

# First Class 2000 Release Notes – Version 3 Build 575

13 July 2004

Please note: These Release notes are provided only to alert you to any changes in **First Class**. See the Help file in **First Class** for more on how to use the new features.

**This release pertains to A+ only. If you are not going to use A+, there is no need to download this if you had already downloaded V567.**

**The release prior to this was a major release and required a new registration key. Schools with a Service and Support agreement would have been sent new registration keys automatically. Contact us if this didn't arrive.**

Shaded items are new features or major changes to old ones.

Menu	Sub-Menu	Details
A+	Installing/Updating	The Autoupdate feature of A+ now working. When a new release of First Class is installed the PDAs will automatically get the latest release of A+. A Helper program has been written to make entering settings into First Class and A+ easier. This program is run at the end of the MSDE installation and gives you the settings that need to be entered into First Class and A+.
	Reason	Fixed bugs in A+ REASON maintenance when deleting records. Also fixed bugs when changing times for reasons.
	Edit Roll	The TAKE ROLL screen in A+ and EDIT ROLL in First Class now only shows teachers who have classes. Previously all teachers were shown whether they had classes or not.
		Fixed a problem in the EDIT ROLL screen when deleting additional students.
		Fixed a bug where reasons were not appearing on menu in EDIT ROLL screen.
	Reports	A "Daily Absence" report has been added. This lists the students absent for the times/date/and classes required.
	Generate/Update Roll Data	You can now select which yearlevels A+ will generate roll data for. This will reduce the size of the database and the sync time if not all yearlevels are being marked.
Options	Fixed a problem with entering some servernames in A+. Names such as "ServerName,1234\HumanEdge" were causing A+ to crash.	
File	Export – SQL Server	Previously it was possible to run an export into the A+ database, a warning is now shown if this is attempted.
	Export - A+ Data	Fixed the A+ text file export. It was previously not exporting data correctly.
Maintenance	Extras	Fixed a bug importing extras with EXTRA CLASSES.
