

First Class 2000 Release Notes – Version 4 Build 590

26 July 2004

Please note: These Release notes are provided only to alert you to any changes in **First Class**. See the Help file in **First Class** for more on how to use the new features.

This release pertains to A+ mainly. If you are not going to use A+, check the First Class changes listed to see whether they are of use to you.

Release 567, (a couple of releases prior to this one), was a major release and required a new registration key. Schools with a Service and Support agreement would have been sent new registration keys automatically. Contact us if this didn't arrive.

Shaded items are new features or major changes to old ones.

Menu	Sub-Menu	Details
A+	Routes	Rooms can now be added to more than one Route.
	Reports	A new report – “Student (absence) By Reason” has been added.
	Generate/Update Roll Data	You can now set an “Active date” for roll-marking. This sets the date which PDA’s mark the roll for.
	Options	You can now delete a day’s roll data. You can now detach a database, if necessary. This will allow you to send it to us for fixing
Maintenance	Extras	Advice slip details are imported during Extras Import.
Tools	Timetables	Teacher names now appear in “Surname, FirstName” format on the tree-view. This makes it easier to find teachers using the FIND function. They still Preview and Print “FirstName Surname” for better display.
Reports	Bar Code – Custom	Fonts in the text boxes now save.
