

First Class 2000 Release Notes – Version 4 Build 641

16 December 2004

Please note: These Release notes are provided only to alert you to any changes in **First Class**. See the Help file in **First Class** (by pressing **F1**), for more on how to use the new features.

This is an interim release to resolve a couple of immediate issues.

Shaded items are new features or major changes to old ones.

Menu	Sub-Menu	Details
File	SQL Server Setup	There was an error creating the database for A+. This has been fixed.
Maintenance	Security	There was a problem updating the Access database if the "GSTAFF" group had been deleted. You can now delete the group without any problem updating.
Registration	Unlock	Lock codes are now in lower case to make 0 and o easier to distinguish.
